**DETAILED DESCRIPTION OF THE INVENTION**

Please add the following abstract:

A band clamp for connecting a hose or pipe end to a pipe is provided. The band clamp includes flange sections which are located opposite each other and which are set apart radially

from one another. The band clamp is clamped around the connection on the flange sections with a member to prevent the band clamp material from creeping under stress. The member is disposed in the area of at least one of the flange sections. A sliding segment for preventing leaks is also provided.
